The Computer Technology minor provides a broad exposure to computer hardware and software technology. The minor is intended for non-engineering majors who would like to develop and understanding of the design and use of computer technology. The minor may be particularly valuable for students who expect to use computer technology in another discipline, who are interested in teaching K-12, or who have a general interest in computer technology and how it works.

The upper-division elective course may be counted for another major or minor.
